Browsing the web for some time, I've got this Win95 computer in my house... - no, no, I don't want to switch to Windows 98 (hehe). Actually, it's not a problem, as I simply want to install the Win98 emulator for Window XP. But the emulator can't find the ISOCODE.SYS of a Windows 95/98, so I thought of downloading (FTP) the ISOCODE.SYS and my Win98 PC should run fine. The problem is: my Win95 PC only has a 56k modem, but the computer can easily get through the Internet. So where can I download ISOCODE.SYS (for Win95/98, but downloadable for any PC)? .
